Create and fund a Gold account

An illustrated ITBFX trading account guide

Learn how to open a real Gold account, receive your account details, deposit funds and transfer money between your own accounts.

Before you start

Before you start, complete registration and identity verification, then sign in to your broker panel.

Not registered yet?

Register with ITBFX

Step 1 / 6

Open My Accounts and create an account

Screen for this step

After registering and completing identity verification, open the panel's three-line menu and select My Accounts.

Tap Create Account to open the trading account form.

The next step creates a real Gold trading account.

Note

Your broker profile and trading account are separate. Create the trading account inside your panel.

Step 2 / 6

Set up your Gold account

Create MT5 Real Account 

Trading Platform

MT5 Platform 

Real/Demo

Real 

Account Types

Gold 

Leverage

400 

Base Currency

USD

Password

Enter your password 

Create Account 

Screen for this step

Select MT5 Platform under Trading Platform and Real under Real/Demo.

Choose Gold under Account Types. The base currency shown is USD.

Select your leverage under Leverage and enter a trading account password under Password.

Review the details and tap Create Account.

Note

The leverage value of 400 in the screenshot is an example, not a required or recommended setting for everyone.

Step 3 / 6

Save your account details

Your trading account has been successfully created

Trading Platform	ACCOUNTS.platformMQ
Account Types	GOLD
Account Number *	3243563
Leverage	400
Base Currency	USD - \$
Balance	0

* When you are logging into the MT5 account, select **"International Trading Brachium"**  from the servers list.

Screen for this step

After creation, a success message and your account details appear on screen. The details are also sent to your registered email address.

Keep your account number, Gold account type, base currency and connection details. To sign in to MT5, use your own account number, trading password and assigned server.

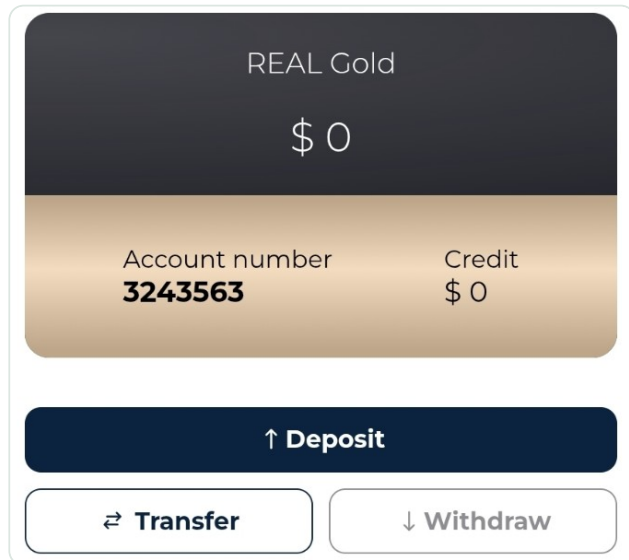

If the email is missing, check Spam or Junk.

Note

The account number in the screenshot is an example. Use your own details for login and deposits. Do not share your password.

Step 4 / 6

Choose the account to fund

Screen for this step

Return to My Accounts. Under Real Account, find your REAL Gold account card.

Check the account number, then tap Deposit on that account.

On the deposit screen, confirm that the destination is the Gold account you intend to fund.

Note

If you have several accounts, always check the destination account number before paying.

Step 5 / 6

Select a payment method

Deposit ⓘ

Cryptocurrency

Online Exchange

Wire Transfer

Deposit to

MT5 Gold - 3243563 ✓

Amount

Enter the amount \$

Cryptocurrency Type

Tether (USDT TRC20) ✓

Deposit

Screen for this step

Choose an available method. The screenshot shows Cryptocurrency, Online Exchange and Wire Transfer.

Check the destination in Deposit to and enter the amount in Amount.

For a cryptocurrency deposit, select the asset and network. The screenshot uses Tether (USDT TRC20).

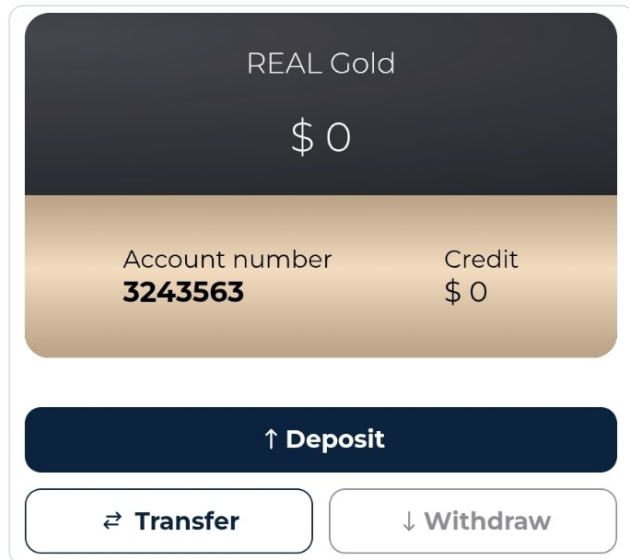

Tap Deposit and follow the next screen's instructions. Once payment is confirmed, check the account balance and keep the receipt.

Note

For crypto deposits, the asset, network and destination address must match the payment instructions. Review each method's options and costs before paying.

Step 6 / 6

Transfers and funding support

Screen for this step

You can later use Transfer to move funds between your own accounts.

Check the source account, destination account and amount before confirming a transfer.

You can also contact PipVero Support on Telegram for help with commission-free funding. Ask support about the method and conditions before paying.

Note

If you need help creating an account, funding it or transferring funds, message support.
